BISHOP SHERMAN VISITS BLAIRMORE

A large audience greeted the Rt. Rev. L. R. Sherman, bishop of Calgary diocese, at St. Luke's church here on Sunday morning last. The service was in charge of the rector, Rev. A. D. Currie, while his lordship conducted the scriptural readings and delivered an able discourse from the subject, "And they accompanied with Him."

During his discourse, Bishop Sherman stated that to him this day was a particularly solemn one, it being the second anniversary of his consecration as bishop of the diocese of Calgary. Since that important event, he has found perfect harmony in all congregations of the diocese and marked progress was evidenced.

Bishop Sherman hopes to pay another visit to this part of the diocese shortly, when the Sacrament of Confirmation will be administered at various points in The Pass.

DISTRICT ORATORICAL CONTEST HERE TOMORROW

The district oratorical contest for the Macleod Inspectorate will take place at the United church here tomorrow night at 8 o'clock. The chair will be occupied by Mr. W. H. Chaplin, chairman of the local board of school trustees.

The contestants will be Miss Lillian Drew, of Fischer Creek, winner of this district last year, and Miss Meridan Jones, of the Coleman high school.

Inspector Bremner, of Macleod; Rev. Roy C. Taylor, of Hillcrest, and Rev. Father Donovan, of Bellevue, will adjudicate.

The contest will be under the direct supervision of Mr. D. MacPherson, local school principal.

Coupled with the contest will be a programme of vocal and instrumental music by high school pupils of the district, assisted by the Rhys brothers, of Hillcrest, the Upton trio of Blairmore, and others.

The public are cordially invited to attend this contest. No admission fee will be charged, but a collection will be taken to help defray expenses.

The winner of this contest will compete in the south Alberta finals to be held in Calgary.

"THE KING OF KINGS" PICTURE FOR BELLEVUE

Watch for the big screen production of Cecil B. De Mille's "The King of Kings," at Cole's theatre, Bellevue, on Friday and Saturday of next week, with matinee on Saturday afternoon.

Supreme in theme—gigantic in execution—a reverent and strikingly beautiful panorama of the tragedy of the ages—history's greatest drama—"The King of Kings" is the most ambitious pictorial presentation of the closing months of the life of Jesus ever attempted.

Last week we attended a play at Calgary, entitled: "What We Know About Women." The ideas expressed were exactly in accord with those contained in our book published two years ago.

Mrs. D. A. Howe and daughter Tina left for Edmonton by Monday night's train, where a specialist will be consulted in connection with the failing sight to the daughter.

RED DEER TO PLAY HERE NEXT MONDAY

Through contributions from a number of the local fans, we have been enabled to get home-and-home games with Red Deer for the provincial intermediate finals, the first game to be played here on Monday night next, the second at Red Deer on Thursday night, March the 7th.

It is sincerely hoped that the hockey-loving people of The Pass will attend the game here, which promises to be the biggest big event of the season.

Buy a tag and prove yourself a booster. Reserve seat tickets are on sale at the Drug Store.

Power and Its Dangers

Down through the ages man has striven for power, and yet more power. From the biblical story of creation we learn that man was given power and dominion over the beasts of the field, and thus early in his career set out to establish his power over all the forces of nature. From that time down to the present with ever increasing eagerness and energy man has sought for power.

It is recorded of Alexander the Great that, having conquered the then known world, he sighed for more worlds to conquer. Egypt under the Pharaohs, Rome under the Caesars, Carthage, Greece, all the great empires of the past strove for power, and, having attained it, were ultimately destroyed by it. The same was true of Napoleon, and in the lifetime of the present generation it has again been proven in the case of the Kaiser Wilhelm.

By way of contrast the history of Britain during the last one thousand years may be noted. The British Empire is today the most powerful political entity in the world. It has gone on from strength to strength and increased in power, not through the automatic use of its power, but, by a paradox, in continually and voluntarily relinquishing powers which it enjoyed to subordinate peoples and colonies, raising their status, conferring new powers on them, and accepting them on terms of equality with itself. The most dangerous period in Britain's history was when it did not pursue such a course and sought to impose its will upon the thirteen American colonies. At that time instead of gaining or retaining power, it lost it. That lesson has never been forgotten by British statesmen.

Power wielded wisely will increase, but exercised unwisely and automatically it will destroy itself. This is just as true in the case of individuals, corporations and associations as it is in the case of rulers, governments and countries. It is especially true of monopolies of all kinds, and it is because monopolies have and do make use of their power unfairly and selfishly that there has developed such a large body of public opinion favorable to the principle of public ownership and operation of all services which in their very nature must be monopolistic, as, for example, railways, telephones, electric power systems.

In the early days of Western Canada the C.P.R. enjoyed a monopoly in transportation. It was rather autocratic; perhaps in those days it had to be, but its management was wise and far-seeing, and, in later years, using its great power for the good of the country, it has grown still more powerful and successful, and, at the same time, stronger in the esteem and goodwill of the people.

The organized grain trade of Canada wielded great power, but, not being so amenable to public opinion, it has lost much of its power. It is still inclined to be selfish and in that fact lies its danger, because it cannot be denied that it is losing instead of gaining in public favor, with the inevitable result that year by year it is being hedged about with greater restrictions and a larger measure of public control.

The same danger confronts the great banking institutions of the country, and the people are becoming increasingly restive under the steady absorption of small banks by the larger ones. The banks may, for the time being, become more powerful, but there is always a greater power, the people themselves, and the banks may succeed in becoming so consolidated and powerful, that it will become all the simpler for the people to step in and take their powers to the nation itself.

In this electrical age, water powers, coal resources, and electrical distribution systems are the very life-blood of industry. Upon them is dependent most of the conveniences of modern life. Control of electrical development means great power, both directly and indirectly. Financial magnates and captains of industry are fully alive to this fact, and there is keen competition throughout the world, and especially on this continent, to obtain such control. It means power in a double sense. It is the live question in the Dominion Parliament, the Manitoba Legislature, the Alberta Legislature now in session, as it was the outstanding question before the Saskatchewan Legislature recently prorogued. It is the biggest issue in Ontario and Quebec, and the outstanding problem at present affecting the relations of Canada and the United States.

In Ontario the controlling factor are the people themselves through their Provincially-owned system. The Saskatchewan Government has adopted the same policy. But unfortunately the situation is not so satisfactory in Manitoba and Alberta. And now come reports that United States interests are seeking to secure control of Canadian companies operating in the west, which would have the effect of bringing this country within the tentacles of the big American Power Trust.

In the first place, and most important, governments and people of western Canada should be alert to prevent any such absorption, and, in the second place, the big power interests should fully realize that, if they overstep the mark, the people will take the matter into their own hands and take back to themselves in the name of their governments, the resources and power to be developed and managed in their own interests.

Finally, a word of warning to corporations and associations generally. It is possible through large memberships and the accumulation of great assets to become powerful. Such power, as already stated, wisely employed, is a good thing and will bring greater power and influence. But here, too, this power for other purposes and in other ways than was originally intended, to attempt to exercise that power in other fields. To do so is to invite disaster, because, as all history proves, the masses of the people will not acquiesce, but, in such exercise of power, the power itself will be lost.

Rights Of Grain Growers

Courts May Determine Matter Of Designating Grain Terminals

A reference to the courts in order to determine the rights of the grain growers of western Canada in the matter of designating the terminal to which their grain may be sent is now likely, consequent upon the

actions issued to the board of grain commissioners by H. J. James Malcolm, minister of trade and commerce. The minister endorsed the suggestion of the board that such action be taken and that the expenses incurred be borne by the board. In this way it is hoped to straighten out the difficulties that have accumulated with regard to the contractual relations entered into between:

(a) The farmers and their wheat pools; and

(b) The pools and the grain trade.

Pending the outcome of this it is not expected that any action will be taken by the government along the lines of abolishing the board of grain commissioners, as suggested in various resolutions passed by a number of farmer organizations.

It is estimated that a person at the height of 5,000 feet can see approximately 90 miles on a clear day.

No Time For Train Travel

Lindbergh Finds Airplane Best Way To Get Around

When Col. Lindbergh set out on the first week in February in a flight to inaugurate the air mail service between Florida and the Canal Zone, he was asked how long it had been since he had travelled in a railroad train.

"More than a year and a half—before I flew to Paris," he replied.

Since he learned to fly, Col. Lindbergh, up to the time of the Florida-Panama flight, had covered 270,000 miles in flight. This distance is equal to about eleven times the circumference of the earth. The time he had spent in the air totaled 3,430 hours, or about four months of the ground. In 1928 he was 800 hours in the air, or more than thirty-three days. In this time his flights totaled 58,000 miles.

"I wouldn't have time to go so many places if I didn't fly," he said.

Toes Made Comfortable Sore Corns Removed

Quick, safe relief is almost instantaneous if you apply PUTNAM'S CORN EXTRACTOR. Shoes won't pinch or hurt. One single drop of Putnam's stops the pain. A few applications make the corn dry up and drop off. Putnam's Corn Extractor gives satisfaction. Thousands use it every day. Get a bottle from your druggist. Refuse a substitute for "Putnam's," the one sure relief for sore corns.

Effective Talk
If we had talked of preparing for peace in time of peace as we have of preparing for war in time of peace, the nations of the world would not be laboring, as they now are, under the burden of billions of taxes every year for armament.

AFTER EFFECTS OF DREADED INFLUENZA

Overcome By the Use Of Dr. Williams' Pink Pills

Throughout Canada influenza prostrates thousands of busy men and women, every winter, wrecking their health and leaving behind numerous serious ailments. It is the after effects of influenza that cause such widespread misery. Here is the reason. Influenza impoverishes the blood; shatters the nervous system and renders its victims victims of rheumatism, indigestion, neuritis and other nervous disorders. You can avoid the influenza by keeping the blood rich and pure with Dr. Williams' Pink Pills, or if because you have not recognized your blood weakness the trouble fastens its fangs upon you, its disastrous after effects can be driven out by the same remedy. Dr. Williams' Pink Pills increase and enrich the blood, feed the starving nerves and thus impart new health and strength to enfeebled men and women.

Here is proof of the power of Dr. Williams' Pink Pills to banish these disastrous after-effects of influenza. Mrs. W. J. Radford, R.R. 5, Bellefleur, Ont., writes:—"I can recommend Dr. Williams' Pink Pills because they put me on my feet and health after other medicines had failed. I was in a bad condition after an attack of influenza. I thought that I would never get well. I tried remedy after remedy without relief till my mother begged me to try Dr. Williams' Pink Pills and gave me a supply. I began using them and before they were all gone I could see they were helping me so my husband bought a further supply. I continued taking them for some time and they fully restored my health. Naturally I am always ready to recommend them to other sufferers and I never lose an opportunity to do so."

You can get these health-renewing pills through any dealer in medicine or by mail, post paid, at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

"Wife: Henry, I'm going to give this blind man a penny. He said, 'Spare a copper, pretty lady.' Henry: Go on, then! He's blind all right."

HELPED DURING MIDDLE AGE

Woman Praises Lydia E. Pinkham's Vegetable Compound

Sarnia, Ont.—"I am willing to answer letters from other women, to tell them the wonderful good Lydia E. Pinkham's Vegetable Compound did me. I cannot be thankful enough for the benefits I received during the Change of Life. I do housework and my troubles made me unfit to work. A friend advised me to try the Vegetable Compound. I felt great relief at once, began to regain my appetite, and my nerves got better. I will recommend your medicine to all with troubles like I had."—MRS. JOSE BASSON, 242 N. Anchored in the Air

Chicago Aviator Kept Plane Motionless For An Hour

It is not unusual for a dirigible to hover over a spot for considerable time. But an aviator at the municipal airport at Chicago, recently kept a plane in the air virtually motionless for an hour. There was a 60-mile gale blowing. The aviator headed into it. He throttled his motor in such a way that the pull of the plane going forward just balanced the pressure of the wind driving it backward. The result was precisely no progress in either direction.

The experiment was interesting but it probably solves no problems, since a stiff wind is not always available for hovering purposes. Some day, however, there will doubtless be developed a device which will enable planes to stay in the air while virtually motionless. That will mean a long step toward safety.

Dread Of Asthma makes countless thousands miserable. Night after night the attacks return and even when brief respite is given the mind still is tormented from continual anticipation. Dr. J. D. Kellogg's Asthma Remedy changes all this. Relieves cough and at once, while future attacks are ward off, leaving the afflicted one in a state of peace and happiness he once believed he could never enjoy. Inexpensive and sold almost everywhere.

Recipes For This Week

(By Betty Barclay)

DATE BREADS
1 cup flour.
5 teaspoons baking powder.
½ teaspoon salt.
1 cup Graham flour.
1 cup chopped dates.
1½ cups milk.
Stir flour, baking powder and salt together. Add Graham flour and dates and mix thoroughly. Add milk and butter slowly, stirring constantly. Pour into greased muffin pans and bake in moderate oven 25 to 30 minutes. This makes 12 muffins.

LAMB STEW BOKARA

2 pounds lamb, broiled.
1 tablespoon butter.
2 cups canned peas or diced celery.
2 cups finely diced carrots.
4 medium onions, chopped fine.
2 cups cooked rice.
1 tablespoon minced green pepper.
1 cup nectarine raisins.
Soup stock.
Salt and pepper.

Cut lamb in small pieces, remove fat (pink membrane), and immerse in slightly salted water until tender. Place with other ingredients in baking dish, add soup stock to cover, and salt and pepper to taste. Cover and bake slowly until vegetables are tender. Stir frequently and add more soup stock as needed. Serve very hot.

A Seasonal Occupation
Lady: "What is your trade?"
Beggar: "I'm a picker, ma'am."

Lady: "A picker? Tell me, what do you pick?"

Beggar: "Well, ma'am, it goes according to the seasons. I pick strawberries in July; in August I pick hops; in September I pick peckles, and the remainder of the year I pick oakum!"

What He Must Know

A young farmer can get along very well without a knowledge of Latin or Greek, but to succeed he must know something of soils, of pests, of fungous diseases and a dozen other subjects that confront him every day. Education is necessary, but not the kind that education speaks of as disciplinary; hard knocks and adversity will accomplish that.

If one be troubled with corns, he will find in Holloway's Corn Remover an application that will entirely relieve suffering.

A race of people in India believe that all elephants have two trunks three eyes and ten legs in the land to which elephants go after death.

Minard's Liniment for the Gripe and Flu.

W. N. U. 1774

Harnessing the Churchill

Most Northerly Hydro Development On Large Scale In Canada

There is more than a touch of romance in connection with the announcement that early next month the first electric power will have been developed and will be available for use on the Churchill River. The Hudson Bay Mining and Smelting Company has an initial development of 2,000 horse-power almost completed to be used in connection with the work of bringing in the larger development of 40,000 ore-power which is required for the operation of the mine and smelter at Fildes. There is little doubt but that this is the most northerly hydro development in Canada, at least in a major way. Island Falls, where the Churchill is being harnessed, is 450 miles north of Winnipeg. A few years ago anyone who suggested that by 1929 the waters of the Churchill would be producing electrical energy would have been looked upon as a visionary dreamer. That it has already come to pass is another proof of the striking rapidity with which the north country is being opened up. The dark waters of the Churchill, suggestive of fur traders, canoe brigades, trappers, and the magic mystery of the north, are being turned to the practical task of making wheels go around—Manitoba Free Press.

World's New Weather Bureau

Stations In Antarctic Planned By Sir George Hubert Wilkins

Twelve meteorological stations in the Antarctic regions are planned by Sir George Hubert Wilkins, explorer, to supply weather forecasts for all the world.

Wilkins announced the meteorological stations when he stopped at Talcahuano, Chile, en route to New York after three months in the Antarctic.

The first station will be established at Deception Island, when he returns there next November, Wilkins said.

While in the Antarctic zone Wilkins said he discovered a tract of land which is not a peninsula of the supposed Antarctic continent, but a series of islands. Wilkins said he also discovered 1,000 miles of coast in the district west of the Weddell sea and was able to correct many geographical errors.

Air Force Extends North

Royal Canadian Air Force To Build a Station At Pelican

The Royal Canadian air force is to build a station at Pelican to form another link in the communication lines used in the north to co-ordinate the operation of forestry patrol planes and machines used in photographic surveys.

The air force already has stations at Cormorant, Lake of the Mines, House, and is building three more this winter. One is at Berens River, on the east side of Lake Winnipeg; one is at Lac La Ronge, north of Prince Albert, and the third is at Pelican Narrows. Ten tons of materials are being sent into Pelican for construction of the station.

Fine Cough Remedy

Druggists Will Observe Buckley's Cough Mixture Week

The week of February 25th, to March 6th, is being observed by the retail druggists of Canada as "Buckley's Cough Mixture Week."

This week has been arranged by the Retail Merchants' Association of Canada and the Provincial Boards of the Retail Merchants' Association, in co-operation with Messrs. W. K. Buckley, Limited, the manufacturers. This product has been on the market for many years and because of its rapidly increasing favor with Canadians during the last few years. "The Week" is being featured this season to focus additional attention on this fine cough remedy.

A Prime Dressing For Wounds—In some factories carbolic acid is kept for use in cauterizing wounds and cuts sustained by the workmen. Far better to keep on hand a bottle of Dr. Thomas' Electric Oil. It is just as quick in action and does not scar the skin or burn the flesh.

Alberta Potato Growers

A New Market Is Opening Up In The Southern States

Southern Alberta potato growers have a new market opening up in the southern states, according to M. L. Freng, district agriculturist, who pointed out that while Montana was quite a source of supply in this direction, the south was beginning to look to Alberta for first class certified potatoes. An organization has been formed in Edmonton to foster this trade with the aid and approval of the Provincial Government.

Use Minard's Liniment for the Flu.

A "Tramp" Aeroplane—A "tramp" aeroplane has successfully undergone its trial flights in England. Having a spacious cabin resembling a railway luggage van, the huge machine can be used as a freight carrier, for the transport of troops, or as a long-distance bomber.

BRITISH PLAN TO BRING SETTLERS TO PEACE RIVER

Toronto.—The Toronto Star publishes the following special dispatch from Ottawa:

A statement published in the London Daily News to the effect that the British Government is training miners to cultivate a seventy million acre tract in the Peace River country lifts the veil from one of the most ambitious colonization and development programs yet visualized for Canada.

Officially the Canadian government has no direct responsibility for the scheme. For the past three years or more financial interests of international prominence have been dealing with details of a project which embodies not only agricultural development of more than 20,000,000 acres in northern Alberta and the northwest territory immediately to the north of the Peace River, but takes into account exploitation of natural resources, oil, minerals, timber, water and power, etc., on a scale unprecedented.

It was known that the general colonization plan had been placed before the governments of several countries, but the declaration that the British Government has actually started prospective settlers upon a course to prepare them for coming to the area suggests that the general proposition has advanced further than was believed. Britain and Scandinavia are the sources from which it is hoped to derive the major settlement.

The general plan includes railways, highways and the extension of Alberta boundaries to bring in the territory for some 100 miles north of Peace River.

Will Help Marketing Of Empire Products

Chair Of Imperial Economic Relations Established In London School

London, Eng.—The Empire Marketing board has made a grant to the London school of economics to enable the establishment of a chair of Imperial economic relations. The board considers the progress of improvements in marketing of Empire products depends not merely on development of biological sciences, which have already received considerable encouragement from the board, but also upon scientific study of the many economic problems which confront those engaged in active development of Empire trade.

The new chair will provide an authoritative centre for the study of such problems and should also increase the study of trained economists qualified to undertake practical economic research along lines calculated to benefit directly the marketing of Empire products in the United Kingdom.

Quota System For Canada

Advocates Restriction Of Immigration To The Dominions

Ottawa.—A quota-system for immigrants entering Canada is advocated by Hon. J. W. Edwards (Conservative, Frontenac-Addington).

Dr. Edwards, in a resolution placed on the order paper of the House of Commons, seeks approval of his opinion that "immigration to the Dominion of Canada should be restricted by the adoption of a quota system which, however, shall not be applied to the British Isles and the United States of America and from which certain specified countries may be practically exempt."

Railfare Sale Of Railways

Edmonton.—After a debate lasting through one afternoon and part of another, the provincial government-owned railroads of Alberta passed into the control of the Canadian Pacific and Canadian National railroads and the Alberta legislature last night of its greatest bones of contention.

Lady Heath Given License
New York.—Lady Mary Heath, the British aviatrix, has received from the Department of Commerce the first aviation mechanic's license ever issued to a woman. She also got her transport license.

Lady Lodge Dead

Salisbury, Eng.—Lady Lodge, wife of Sir Oliver Lodge, the noted scientist and research worker in physics, died recently at her home near here. Sir Oliver was at her bedside.

Starts New Exploration Flight

Byrd Expedition Reports Important Discoveries At South Pole

New York.—The New York Times, The St. Louis Post-Dispatch and their associated newspapers have received a delayed dispatch from their correspondent with the Byrd Antarctic expedition telling of a new exploration flight begun by Commander Byrd over King Edward VII. Land to the south of the mountains he discovered recently.

The flight was being made with two planes, a Fokker in which were Commander Byrd, Bernt Balchen, pilot, and Lloyd Berkner, radio operator, and in the other, Captain Park, Harold Gurn, pilot and navy radio operator.

The correspondent's brief dispatch was sent by dog team from Little America. The Byrd headquarters, however, to the base City of New York at the ice barrier, for transmission by wireless.

At the time it was sent the correspondent reported wireless messages coming from the "planes showed that the flight was still in progress and already had been productive of important discoveries, which would be made known when the planes returned to their base.

Require More Radium

Small Supply Handicaps Toronto Doctors In Cancer Treatments

Toronto.—Effective treatment of cancer in Toronto, other than by surgery, is materially retarded by the small supply of radium available, declared Dr. Herbert A. Bruce, professor of clinical surgery, University of Toronto, in the course of a paper delivered before members of the Academy of Medicine.

Toronto's whole supply of radium, the speaker said, consisted of the small amount of one-half gram, or about \$25,000 worth. The least amount necessary to successfully carry on a battle against the disease would be two grams, he added. He suggested collecting a \$500,000 fund which could be used for the purchase of nine grams, an amount sufficient to enable local surgeons to effect many more cures in cancer than is now possible.

Suggests C.P.R. Branch Line Into The Pas

Memo Launched By Head Of Ross Navigation Company

The Pas, Man.—A move to have the Canadian Pacific Railway build a line into "The Pas" was launched here, when Harvey Weber, president of the Ross Navigation Co., and president of Transports, Limited, urged the Rotary Club to take the initiative.

Mr. Weber advocated asking the C.P.R. to build down the Carrot River Valley to The Pas, and secure joint running rights over the Hudson Bay Railway. He declared numerous grade towns south and west of here served exclusively by the Canadian Pacific Railway would thereby get through freight rate to Churchill instead of two rates.

Supplies For H.B. Terminals

House Told \$210,570.38 Was Spent In Halifax During 1927

Ottawa.—A sum amounting to \$210,570.38 was spent in Halifax by the department of railways and canals and the department of marine and fisheries in 1927 in connection with the activities in Hudson Bay. This was disclosed in a return tabled in the House of Commons in answer to a question by W. A. Black (Cons., Halifax). It was shown that the railway department spent \$50,283.96 with Halifax firms for supplies on account of the Hudson Bay terminals. The marine department bought \$40,721.99 worth of materials from A. S. MacMillan for the Hudson Bay Straits Expedition, and \$118,111.43 worth from other firms in the way of supplies.

May Get Permit

Washington.—Bert Acosta, whose pilot's license was revoked by the commerce department last June, may be granted a new permit, but cannot use it until April 18. Acosta conferred here with assistant secretary of commerce MacCracken, and was advised to appeal to the department for withdrawal of the \$500 fines for violation of air regulations and then take a new examination for a pilot's license.

Irish Minister To Germany

Dublin, Irish Free State.—The first minister of the Irish Free State to Germany will be Prof. D. Blahy. He is a member of the faculty of the National University of Ireland. It is the intention of the government to appoint a minister to Paris soon.

Will Discuss Resolution

House To Debate Matter Of Banning And Loading Of Wheat

Ottawa.—The unloading and binning in public elevators of certain grades of wheat is the subject of a resolution placed on the order paper of the House of Commons, by T. L. Donnelly, Liberal, Willow Bunch.

Mr. Donnelly proposes that "the grades of wheat known as Nos. 1, 2 and Northern, and 4, 5 and 6 wheat be loaded into bins or cars, or in transit for milling or export." The matter will come up for discussion in the House shortly.

PAYS TRIBUTE TO LEAGUE OF NATIONS' WORK

Ottawa.—There is no royal road to peace, but there are many paths which lead in the direction of peace and the Briand-Kellogg treaty is one of these paths," Premier King said during the House of Commons debate on the Kellogg-Briand pact.

Premier King praised at this moment to pay tribute to the work of the League of Nations towards peace. Touching upon disarmament, Premier King said it was true that progress toward disarmament had not been as great as one would like, but considerable progress had been made. The pact created a solemn covenant binding nations not to go to war as a means of settling differences.

The Senate of Canada has already ratified the pact.

Mr. King sketched briefly the history of the treaty, which he said, had now been accepted by 62 nations. It was the original work of "to be bound in a feeling of revolt against war, the part of all nations which have had to do with war in the recent past."

The treaty did not pretend to establish machinery for the prevention of war, but it called forth from the nations of the world "a solemn renunciation of war as an instrument of national policy."

The League of Nations did not include within its membership all the nations of the world, said the prime minister, in pointing out some of the advantages of the treaty. The United States was not a member of the League of Nations, but it had signed the treaty for the renunciation of war. One or two other countries were in the same position.

Support of the treaty, coupled with a note of warning that there must be disarmament, if peace is to be more than a dream, was the burden of the speech with which Hon. R. B. Bennett, Conservative leader, followed Mr. King.

Ramsay MacDonald Is Feeling Fit

Denies Reports That He Is Suffering From Falling Health

London, Eng.—Right Hon. Ramsay MacDonald, Labor leader, has denied a report that he was feeling his political responsibilities too heavy. It had been suggested that the Labor chief was in falling health.

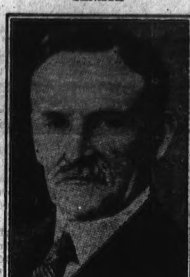

He declared that as a matter of fact he was perfectly fit and was putting on weight.

Pirates!

No sailor, however, would be much alarmed if these pupils of Mary Lodge were at large upon the main. This bold band group featured the scene was at the Sea Music Festival, recently held at the Vancouver under the auspices of the Canadian Pacific Railway.

CONSERVATIVE LEADER IN SENATE

Senator W. B. Willoughby, of Moose Jaw, on Feb. 8, was elected Conservative leader in the Senate at a caucus which was held in the capital.

Will Not Issue Invitation

But British Government Is Still Considering Naval Conditions

London, Eng.—Replying to a question, Sir Austen Chamberlain, British foreign secretary, told the House of Commons that the government had no intention of issuing invitation to a new conference on naval disarmament.

Sir Austen re-affirmed a previous announcement that all questions, concerning British relations with the U.S. and the naval conditions of the two countries are under consideration by the British Government.

"Our examination of this is being diligently prosecuted," he said. "As soon as it is concluded the first step will be to communicate with the Dominion."

The foreign secretary said the recent statement on disarmament in Washington made by Sir Esme Howard, the British Ambassador, was not made in the instructions of the British Government.

May Create Another Province

Tenth Province In Northern Area May Be Solution

Edmonton.—That the Dominion Government could scarcely be expected to extend the boundary of any one of three prairie provinces—Manitoba, Saskatchewan or Alberta—without dealing with all three and also with the whole of that area now administered by the Dominion as the North West Territories, was the statement of Premier J. E. Brownlee in the Legislature here.

The Premier said that while he did not wish to directly quote any person, he had gathered while in Ottawa that the disposition of the Dominion Government at present was rather to create another province from the territories than to divide them up between the other provinces.

The Premier said he was not inclined to take the reports of Saskatchewan's efforts in this direction seriously.

Will Meet In London

London, Eng.—The Marchioness of Aberdeen and Tennyson, who is president of the International Council of Women, is calling a conference of rural women to meet for a fortnight in London, from April 30 to May 14, 1928. An appeal is being made, especially to Canada to send some representative rural women—this because Canada is the pioneer in organizing rural women.

Airships Ready For Tests

British Machine Has Accommodation For One Hundred Passengers

Howden, Yorkshire.—The R-100, the biggest airship in the world, being built at Howden, will undergo its first tests shortly.

Only the fastening touches to the structure remain to be made, gas bags being almost ready for inflation.

A speed of 100 miles an hour is expected to be attained by the 4,500 h.p. engines of the airship. It has luxurious accommodation for a hundred passengers. It is intended to fly the Atlantic with a full complement of passengers after the tests have been completed.

Rationing Bread In Russia

People Are Using It To Feed Hungry Cattle

Moscow.—Bread books issued by the government will govern purchase of bread after March 15, the Moscow Soviet or governing committee has decided.

The committee, which acts when the Soviet is not in session, was ordered in a resolution to work out details governing the distribution of bread under the new order. The resolution, after stating that the red capital was amply supplied with baked bread, went on to say that the main difficulty lay in speculation and in feeding cattle with bread which was cheaper than fodder.

CONSTRUCTION OF A NATIONAL HIGHWAY URGED

Ottawa.—The railway terminals situation in Montreal must be faced "and faced in a rather large way in the very near future," Hon. Charles A. Dunning, minister of railways and canals, informed the House of Commons. The minister was speaking during debate on the resolution of D. F. Kellner, (U.F.A., Athabasca), which called upon the government to consider making a further federal grant for the next five years' highway construction.

Mr. Dunning drew attention to the fact that Canada was the owner of a large railway transportation system, and that its needs must be considered when large expenditures from the federal treasury on highways were contemplated. He did not, however, place on record as being opposed to the construction of a national highway.

"But I do say, we must always have regard to our over two billion dollar investment in railways providing for the development progressively, over a period of years, of a form of transportation which will tend to reduce possibility of our railways earning their own way," warned the minister.

Mr. Dunning stressed the point that the provinces themselves prefer increased subsidies to grants which are earmarked for some specific purpose, such as highway construction. They were opposed to government grants with strings attached.

Later debate was productive of an amendment from A. M. Carmichael (Progressive, Kingston), which favored the construction of a national highway from coast to coast as soon as possible.

The majority of speeches favored federal aid in the construction of highways. The advantages which would accrue to the Dominion through increased tourist traffic, and the additions to the federal treasury because of the purchase of more motor cars were mentioned as arguments for the resolution.

E. J. Garland (Progressive, Bow River), said that nothing would serve as well as a national highway to bring the east and west together. It was equivalent, to think that it was crossing the country by automobile, it was necessary to travel part of the way in the United States on account of the roads.

"There is not a prairie member," Mr. Garland declared, "who has not experienced a thrill by the sight of a motor car with a Quebec or better still a Nova Scotia license."

Dr. T. E. Kayser (Progressive, Ontario), said the great need of the west was communication by good roads. He favored the resolution.

David Spence (Conservative, Parkdale), said he noticed that support of the resolution was only coming from his side of the house.

The members of the opposite side, Mr. Spence said, "especially the members from Saskatchewan, are sitting there as if puzzled."

In his opinion, good roads were a national welfare.

UNEMPLOYMENT INSURANCE PLAN TO BE PROBED

Ottawa, Ont.—Canada's unemployment situation, and the practicability of establishing a scheme of unemployment insurance, will be matters for exhaustive investigation by the House of Commons committee of industrial and international relations. The committee sat for the first time during the present session, and laid the foundations for this research.

Henri Bourassa (Liberal-Labelle) explained to the committee Canada's unusual position as a nation where seasonal unemployment was always prevalent in winter, yet such were the demands of harvest time that in the summer thousands of United States laborers crossed the border and worked in Canadian fields, he said.

Co-operation of provincial governments will be sought by the committee to bring out figures which will eliminate the unemployment conditions in Canada.

Experts will attend the next meeting of the committee to report on the family allowance and other related schemes, which is claiming the attention of the members.

Grading Of Beef

New Regulations Will Shortly Be Put Into Effect

Ottawa, Ont.—The governor-general-in-council has approved regulations governing the voluntary grading of beef ordered for sale in Canada. Hon. W. W. Motherwell, minister of agriculture, announces that the regulations will shortly be put into effect and graders appointed.

The regulations provide that brands shall not be applied to beef unless slaughtered in inspected abattoirs, and bearing the meat inspection stamp "Canada Approved." All brands must be registered with the minister of agriculture and before these brands are approved, an inspection will be made of the grading of beef at the establishments where the brands are to be used.

Failure to comply with the provisions of the regulations by any establishment in selling branded beef may result in the minister withdrawing the right for such establishments to use brands. When a retailer, through his practice in selling branded beef, is selling may be reducing the eating quality of the beef, provision is made in the regulations for the minister to notify establishments supplying the beef to stop selling to that particular retailer.

Canada's New Destroyers

Details Are Completed For First War Vessels Ordered By Dominion

London, Eng.—Commodore C. W. Rose, director of naval services of Canada, will return to the Dominion on the steamship Montclair, sailing for St. John, N.B., having concluded the final details for the two new destroyers for Canada.

The destroyers, to be completed in two years, are of the latest British destroyer type of 1,350 tons, speed 37 knots and with four 4.7-inch guns and two two-pounder guns. They are the first war vessels ever ordered by Canada.

Radio Plans Completed

League Of Nations Will Conduct Broadcast Trials In March

Washington.—The radio commission has received a communication from the secretariat of the League of Nations through the state department, announcing plans of the League to conduct short wave broadcast trials in March to Canada, the United States, South America, Japan and Australia.

Speeches of general interest to the world will be broadcast. The broadcast to America will be conducted on March 12, 19 and 26. "POLI" is the league station and it uses a wavelength of 18.4 metres.

Will Visit Saskatoon

Saskatoon.—Viscount and Lady Willington will pay an official visit to Saskatoon, April 1, according to notification sent to Mayor Norman. Plans will be made to give the vice royal party a rousing reception.

Reindeer Shipped To Canada

Stockholm.—A consignment of 300 live Swedish reindeer, the largest number ever exported at one time, has been shipped to Canada through a Norwegian port.

DID YOU EVER STOP TO THINK?

(By Edson R. Waite, Shawnee, Oklahoma)

That people who are interested in buying merchandise at a moderate cost have an opportunity of doing so by reading the newspaper ads.

That when they take a look at the very low prices of the various items offered there, they will readily see that it pays to buy from the business concerns that advertise.

That everyone should avail themselves of the many bargains offered by the stores that advertise.

That co-operation is the life of a town. Every citizen should co-operate by spending their money with the live business concerns of the home town.

That stagnation of business in a town means hard times for all.

That good business means prosperous times for all.

That co-operation creates stagnation kills.

That progressive citizens are loyal citizens; they co-operate with local business and by so doing they keep their town progressive.

Lack of co-operation is the greatest hindrance to the progress of any town.

KIND AND MANKIND

The study of the meaning and roots of words used in every-day conversation is an interesting and profitable hobby. We speak of a kind person, and we speak of mankind and perhaps, if we think about the matter at all, we seem to ourselves to be using quite different words, or the same word in senses quite unconnected. But connected they are. A kind person is a kindred person, one of kin; one who acknowledges and acts upon his kinship with other men. And so mankind is mankind.

TURKEYS BRING WOMAN \$8000

What was perhaps the record flock of turkeys in the province totalled 2000 mammoth bronze birds which were raised on open range at Ardennode and brought Mrs. Freeman a gross revenue of around eight thousand dollars last year. Early in the season, Mrs. Freeman realized \$1000 from the sale of hatching eggs, and later on an equal amount from the sale of breeding stock. Early in December she killed 1800 turkeys, averaging in weight over ten pounds, and realized fancy prices.

WILD STATEMENTS

"Under government control British Columbia, with a population no larger than that of the city of Toronto, has a drink bill it is said, of nearly \$18,000,000. That amount is too large a sum to be spent on intoxicants by that number of people under any system of sale."—Toronto Star.

The Star doesn't take into account the tremendous week-end exodus from the Pacific coast states into British Columbia.—Ex.

High River and Nanton fans were particularly impressed with the brand of hockey put up by the Blairmore Bearcats and are very anxious that one or two exhibition games between the three teams be staged before the season closes.

According to the Albertan of yesterday's date, a Dane named Soren Nilsen has been arrested "with a quantity of goods, alleged to have been stolen, in his possession."

THE CROW AS MAIN LINE

Speaking of the possibility of the C.P.R. making the Crow route a main line, the Fence Free Press has the following to say:

The proposed connection would enable the Canadian Pacific to cut off its present great main line detour from Medicine Hat north through Calgary to Banff, Lake Louise, Field and Golden, famed as the heart of the Canadian Rockies. West of Golden the present main line again swings south many miles to Hope.

The new road would be almost a direct east and west line, cutting off summer, but the cause of much trouble in winter. It is near Golden that the big bridge, said to be nearly 300 feet high, went out two or three weeks ago, thereby forcing the C.P.R. to route its freight and other heavy business over the Spokane International and west on the Great Northern to Vancouver.

The new route, running west from Medicine Hat, would tap the rich farming regions of southern Alberta, would go through Lethbridge and Macleod famous grain countries, the Crows' Nest coal country, the Elk river valley, famous for its coal and where the Consolidated Mining Company, owner of the smelter at Trail and the Sullivan mine at Kimberley, has discovered great nitrate deposits which it is preparing to utilize and manufacture into fertilizer.

It would tap the coal region of Crows' Nest Pass and Fernie, would reach Cranbrook, ten miles from the Sullivan mine at Kimberley, would then tap the big timber country south of Cranbrook, which already has a number of immense lumber mills.

Then it would go through the fruit country near Creston and the Kootenay Lake region and would connect with Nelson, Roseland, Trail, Grand Forks and other nearby mining regions. It would tap the fruit country near Pentteton and would reach Hope, which is about a dozen miles north of the boundary line and where it would rejoin the C.P.R.'s present main line.

WHAT THE C.N.R. HAS ACCOMPLISHED

To weld the various units each more or less self-contained and maintaining to a large extent the structure of an independent organization, into an harmonious, economically operating whole, is, in itself, a feat of no mean proportions.

To change an operating deficit of \$3,000,000 in 1922 to an operating net of \$45,079,000 in 1927 ranks high as an administrative accomplishment. The figures for 1928 are even better. For the first eleven months the enormous total of \$53,549,000 net has been reached.

But to perform both these staggering tasks within the short period of six years, well-nigh approaches the miraculous.

Yet, that is what Canadian National has done under the leadership of Sir Henry Worth Thornton, K.B.E., since he took the reins as president and chairman of the board of directors in 1923.

During this period of re-adjustment, curtailment of operating and overhead expenses through judicious territorial re-groupings of services and offices, went hand in hand with a vigorous campaign for traffic. Success in both directions became tangible almost from the outset.

Improvements, too, in properties, equipment and facilities were provided for, while a spirit of loyalty to the organization and a desire to make it of the utmost service to the travelling and shipping public, was inculcated throughout its widespread personnel.

And it is, after all, this spirit, fostered by recognition of the fact that a railway's service is measured by the ability of those comprising its operating force, that has been mainly responsible for Canadian National's remarkable progress since co-ordination.

Each man on the system, from the president to the humblest employee, is imbued with the one idea—that of

BLAIRMORE UNITED CHURCH

Rev. J. W. Smith, B.D., Pastor

Serve the church that the church may serve you.

Services on Sunday, March 3rd, the Pastor in charge—

SENIOR SCHOOL at 11 a.m.

JUNIOR SCHOOL at 2 p.m.

EVENING WORSHIP at 7:30 p.m.

You are especially invited to this service. The music is being arranged by the Hillcrest Concert Party. The Pastor will preach on the "Saving Power of God."

TUESDAY at 8 o'clock, the Jesus Art Craft, or Clay Modelling class, will open. You are invited to join. Entrance fee \$2.00.

LADIES' AID—The regular monthly meeting of the Ladies' Aid will be held in the Mission Hall on Wednesday afternoon next, March 6th, at 4:15. Members are asked to bear this in mind.

WEDNESDAY, March 6th, at 8 o'clock, the Hillcrest Concert Party, which is a Welsh male voice chorus of sixteen voices, will give a grand concert in the Church the proceeds of which will go toward the Building Fund. Wherever these Welsh singers have gone they have been well-received and we are looking forward to this concert by them as the outstanding music event of the season. The program in part is as follows: Choruses, "The Jolly Roger," "In Absence," "The Crusaders" and "The Sailors' Chorus" by the choir; violin solos, Miss Verdun Leigh; pianoforte solos, Tom Beynon; comedy songs, T. Protheroe; duets, Rhys Brothers; comedy quartette, "The Policeman," solos by Edgar, Percy and Cecil Rhys; tenors; Rhys Jones, bass, and Tom Cuthbert baritone. Doors open 7:30.

INSTITUTE PUBLIC LIBRARY

The "flu" was responsible for one omission and Prohibitory meeting in Lethbridge for the other omission of acknowledgments of books given to the Library. However, here they are now:

"Times Encyclopedia," from Capt. Beebe, 9 volumes; 158 volumes, mostly fiction, from the Calgary Public Library. This is the second batch from Calgary. Blairmore is indeed thankful for this splendid contribution now totalling over 500 volumes. An encyclopedia and other books, totalling 15 volumes, from John Kerr. Mr. Griesbach has also added an encyclopedia to his previous generous gifts. Twenty-eight volumes came from Mr. J. W. Gresham; 35 volumes from a former resident of Blairmore came through Mr. Gillis. Fourteen volumes, including a six-volume set of a "Children's Reference Work," from Mr. Farmer. This makes a total of 268 books received during the last three weeks.

The date of opening will be announced in next week's Enterprise. In the meantime carry out that good intention and let us have your contribution of books.

W. M. Bush has purchased from Capt. W. A. Beebe the property at the corner of Victoria Street and Tenth Avenue, which had been leased by him for the past several years and where he has carried on the business of the Blairmore Vulcanizing & Battery Station.

serving the public as it should be served, by the largest railway system in America.

Sloan: "When you were staying down at Long Island, did you ever meet a fellow with one leg named Sanders?"

Square (pondering): "What was the name of his other leg?"

IN MEMORIAM

(From The Strathmore Standard)

Ernie Whiteside has been reading in the paper where a Claresholm lady had presented her lord and master with triplets and that all were "doing well." "Believe me," said Ernie, "I'll say the daddy will need to do well, and then some. But I'll bet that news item will keep Editor Bartlett, of The Blairmore Enterprise, a free nigger for another twenty years. It's a real warning to that gentleman."

Scene along the route, Sinclair Canyon, Calgary and the Loch of Sault Ste. Marie, Ontario, as the Empress of the North will appear. Vancouver, Chateau Lake Louise.

Dean Sinclair Laird of Macdonald College, Ste. Anne de Bellevue is better known as an educationist than a philanthropist, but he is really both. Some years ago he made a tour of the Canadian west. His time was more or less limited and in planning his itinerary he was obliged to miss several points he considered worth while and to spend more time than he thought necessary in places less interesting. While he made up his mind that this condition should not obtain if he made the trip again, he was greatly thrilled by his journey. The beauty and the wonder of the Canadian west deeply impressed him and he re-

turned, as he says, with a more sympathetic understanding of the western people and problems and more thoroughly convinced that the education of a Canadian can not begin until he has seen his own country.

It was his idea that if a tour could be organized at reasonable cost, to cover all the important cities and resorts west of Toronto, and the participants were assured of relief from all the worries of travel arrangements, enough might be interested to warrant the running of a special train.

Thus the first "Dean Laird Special" came into existence and

and the Pool at Banff where members of the 1928 team were seen departing themselves.

hundred people through the great cities and scenes which lie between Montreal and Victoria—Banff, Lake Louise, Winnipeg, Edmonton, Vancouver—over a diversified route. He has found that, while the travellers appreciate having a special train as a home and base, they appreciate the Great Lakes and optional motor runs, so that the steamships and the motor cars are very generously used by him.

The Dean is doing a great work and the only qualifications he demands from applicants or membership in his tour are companionship and the capacity for enjoyment.

Newest Lifeboat Gear

When the Canadian Pacific liner Duchess of Bedford arrived in New York recently to start a series of cruises to the West Indies, the crew, under the direction of Captain H. Sibbons and his officers, demonstrated the efficiency of her up-to-date lifeboat gear in a fashion that amazed the inspectors.

Shown above is the latest thing in lifeboat lowering equipment, capable of lowering twenty-eight boats in ten minutes. The davits, which are controlled by one man, slide down the rails until the boat is at deck level. It is then lowered by gravity to the water and can be released by trigger, the falls then being hoisted again and attached to another boat which is hoisted on the same davit.

United States officials stated that this Welin-MacIntosh gear was the most efficient ever seen in New York.

Ste. Petronille

Jack Strathdee, the very able winter sports director at the Chateau Frontenac, his friends will be pleased to learn, is losing weight. Jack runs a summer camp at French River in the fishing season and he took his present job for the reason that he wanted to rest and "draw a salary" at the same time. When he has time to reflect, and this is seldom, he longs for the easy job of operating a camp, and handling a crowd of "Indian guides." He finds no rest, for during every daylight hour there is something doing on the ski-slope, on the rink, on the slide—and a hundred people to provide with sports equipment and direction. But he keeps fit as they all do. The air is bracing and invigorating, and there is a lot of fun.

In the group above one sees the director assisting Their Excellencies Lord and Lady Willington who have just come down the slide for the third time. The other group perhaps explains why he finds so much pleasure in his work and why he has taken up skiing again. There is also a picture of his rink which shows how the slide in the background drops down steeply from the chateau.

But like the other picture. This will show you Jack Strathdee's most recent discovery. Beyond the dogs and the terrace is a field of free ice. Beyond that the lake of Orleans is a shadowy form. Now to the left of the island, just above the lamp standard, great slabs and chunks of crystal and opaque ice hurled themselves in a mass, coat reefs of glistening pinacles to the sky in one glorious chaos and screeching, groaningly settled down. Then the mayor of St. Germaine and the mayor of Ste-Petronille set out, each armed with a small spruce cutting. They met somewhere in the centre of the river, solemnly shook hands, and the ice bridge was declared open. It was after that, that the sports director drove over and discovered Ste-Petronille with his ski slopes and toboggan and snowshoe prospects, and also the "Catalogue." The "Catalogue" has a rubric stone fire place of catalogues about the floor and as window drapes, the oddest old furniture and quaint bed-rooms and, above all a splendid cuisine. It is less than one hour from Quebec and is hailed as a great discovery.

The following appointments have been made by the Drumheller council for the year 1929: F. T. Hayden, solicitor, \$400; Charles Christian, auditor, \$400; health officer, \$300; mothers' allowance officer, \$50.

The Welsh folk of Hillcrest will hold their annual banquet and concert in the Masonic hall at Hillcrest on St. David's Day, Friday, March 1st, banquet to be served at 7 o'clock, followed by a concert.

NOTICE OF APPLICATION FOR CHANGE OF NAME

CANADA
Province of Alberta

NOTICE is hereby given of the following application to the Provincial Secretary under the provisions of The Change of Name Act:

I, Feordora Andrew Hrihoriew, of the hamlet of Hillcrest, in the Province of Alberta, hereby make application under the provisions of The Change of Name Act for a change of name as follows:

From my present name, Feordora Andrew Hrihoriew, to Fred Andrew Gregory.

The full name and ages of my unmarried infant children are as follows:

Catherine Barbara Hrihoriew, aged three years and nine months.

Helen Marie Hrihoriew, aged one month.

And I also make application as aforesaid for a change of the given name of my wife and my unmarried infant children as follows:

From Mary Hrihoriew to Mary Gregory (Wife).

From Catherine Barbara Hrihoriew to Catherine Barbara Gregory.

From Helen Marie Hrihoriew to Helen Marie Gregory.

The present ages of such children being respectively three years and nine months, and one month.

I, Mary Hrihoriew, wife of the above named applicant, hereby consent to the foregoing application for a change of name.

(Signed) MARY HRIHORIEW.

In witness whereof I have hereunto set my hand this 26th day of February, A.D. 1929, at Blaimore, in the Province of Alberta.

(Signed) FRED HRIHORIEW.

(Signed) W. L. WARKE.

COMIC ADVERTISEMENTS.

Advertisements are funny things sometimes, as for example, these, were actually printed:

"A respectable young woman wants washing."

"I will make coats, caps and boots for ladies out of their own skins."

"Wanted—A girl who can cook; one who will make a good stew."

"I want an overseer who can take care of 5000 sheep who can speak French fluently."

"I want a husband with a strong Roman nose and with strong religious tendencies."

"For sale—A small stock of the same whiskey drunk by His Majesty on his recent visit to Dublin."

"For sale—A good cow that gives two gallons of milk at a milking and a lot of household and kitchen furniture"—and under things.

THIS SHOULD BE STOPPED

A few days ago we saw a little girl chewing a piece of paper with the picture of a whiskey bottle on it.

FISHER BODIES provide Outstanding Beauty and Value

WHEN you make your first inspection of The Outstanding Chevrolet of Chevrolet History—pay close attention to the beautiful new Fisher bodies!

Not only do they represent one of the greatest style triumphs ever achieved by Fisher designers—but in soundness of engineering and excellence of construction they are worthy of comparison with the world's finest coachwork.

These handsome new Fisher Bodies combined with the superb smoothness, power and acceleration of the new Chevrolet Six-Cylinder engine, provide a standard of motoring luxury never before available in the low-priced field.

Come in and see this remarkable automobile—today!

—a Six in the price range of the four!

PRODUCT OF GENERAL MOTORS OF CANADA, LIMITED

FROM AN OLD SCRAPBOOK

From a fifty-year old scrapbook, the following lines were taken from a poem entitled "The Telephone" and written on April 1, 1877:

An' they say it's all thrue, and before a long time

We'll hear cannons fire, and parish bells chime.

An' this wud the ginty they'll be grand affairs,

For they'll hear Queen Victoree sayin' her prayers:

An' whin it's complayted they'll be a new era,

For them that are far thin will speak to us nearer,

An' the Queen will speak pliant to President Hayes,

Who'll speak back, like Grant, "Let's have peace, if you please."

No one will deny especially in the light of recent events that the author of these simple lines was gifted with true prophetic vision.—The Blue Bell.

NOT THAT KIND OF GIN

In the rather dreary desert of official correspondence there is to be found an occasional oasis of human interest. One of these rare lighter touches came to the notice of the Editor recently in looking over a very stodgy and solemn file dealing with questions relating to auction sales of unclaimed and unclaimed goods. In the list of goods to be disposed of at the port of Vancouver the innocent item appeared "five packages of cargo gins." The department officer handling the file noted the word gin and, being acquainted with no other kind than that usually found in the pleasant companionship of one John Collins, wrote the Collector requesting him to withdraw these goods from the sale list as they could not be disposed of by auction under the regulations. In due course a reply reached the department that the packages in question were not intoxicating liquors but consisted of heavy pulleys or blocks for use with tackle in handling cargo, and were commonly called gin blocks. So there you are.

A Regrettable Error

It was in America—the adopted country of many races—that two men, who had been working together in a ditch, quarrelled.

Finally one of them crawled out and went home. His wife, meeting him at the door, exclaimed: "F.W.H., whatever is the matter, John?"

Said John: "Oh, I've such a good joke on that Irishman. We was working ditch, and got in fight. He bat me in the eye, and say, 'You Swede, you!' He mash me in now and say, 'You Swede, you!' Den he hit me in mouth, knock two teeth out, and say, 'You Swede, you!' Und all the time I was a Norwegian!"

"I cannot understand," said the vicar, "why so many of our congregation go straight from church to the public house."

"Oh," said his lively curate, "that's what's known as 'the throat after righteousness.'"

Better Wait

The picture showed a bevy of shapely girls disrobing by an old swimming hole, for a plunge. They had just taken off shoes, hats and coats and were beginning on a passing freight train obscures the view. The next picture shows them in the water.

An old railroadier sat through the show again and again.

Finally a friend tapped him on the shoulder and said: "Aren't you ever going home?"

"Oh, I'll wait a while," was the answer, "One of these days that train is going to be late."

Even a girl with a graceful carriage is never satisfied until she lands an automobile.

A Vancouver woman, while fishing, caught a green fish. Some marry them.

FERTILIZER INDUSTRY

AT FERNIE

Speaking of the new fertilizer plant to be established at Fernie, the Vancouver Province has the following to say:

"We may expect to see repeated at Fernie by Consolidated Mining & Smelting Co., in connection with its phosphate development a new industrial mining enterprise similar to that of Anaconda in Idaho. The crude rock will of course go to Trail smelter, where it will be manufactured and shipped to all parts of British Columbia and the prairie provinces to supply the demand for fertilizers of home production. Eastern Canada formerly had superphosphate industries, located in the province of Ontario and Quebec. The source of the raw material was the apatite deposits. These are limited, being estimated at not more than 380,000 tons. The industries succumbed to competition from Florida superphosphate. Canada had practically disappeared from recognition in the statistics of the world's phosphate resources, and has to thank British Columbia for restoring its reputation in this respect. The importance of the superphosphate industry is evident from the fact that world markets now consume 125,000,000 tons a year, and the demand for these fertilizers is rapidly increasing."

"Two more constituents are necessary for the complete success of a fertilizer industry in this province. These are nitrogen and potash. There are no known deposits of nitrates in British Columbia, but the required nitrogen can be recovered from the atmosphere by electric fixation for which cheap power is necessary. Consolidated Mining & Smelting Co. has that advantage in the plants of the West Kootenay Power & Light Co., at Bonnington Falls, and can supply this element ad libitum. With potash it is different. No deposits of potash are known in the province. This is rather remarkable in face of the fact that samples from British Columbia, exhibited at the World's Fair in Chicago, were pronounced of the finest quality."

Didn't Happen in Blairmore

A man entered a western barber shop for a shave. The tonorialist went to it. Occasionally he hacked into the face of his customer and when he did so he moistened a bit of paper and placed it on the bleeding spot.

The victim stood several repetitions of this form of first aid, then he rose in the chair. "Say," he demanded with some spirit of the barber. "What are you, a barber or a paperhanger?"

Friend, to local young lady: "That's an interesting looking ring you are wearing. Is it an antique?"

L.Y.L.: "Well, hardly; but it once was the property of a famous millionaire."

F.: "Indeed! Who?"

L.Y.L.: "Woolworth."

Terrible Mistake

"Have you ever made a wrong diagnosis, doctor?"

"Yes, I once treated a patient for stomach ache and found out later that he could have afforded an operation for appendicitis." — Viking.

Doctor (feeling Sandy's pulse): "What do you drink?"

Sandy (brightening): "Oh, I'm no particular, doctor! Anything you've got."

He: "Did you hear the story about the tight Scotchman?"

She: "I thought Scotchmen were all tight."

He: "Not now. It costs money to get that way."

Father: "Son, you're not muscular. Why don't you exercise with dumbbells?"

George: "I do, dad. You should have seen the one I hid at the dinner last night."

A local boy a few days ago asked: "Daddy, what is dew?"

Daddy: "The rent, the note at the bank and the instalments on my car."

Floorwalker: "Come, come, my man. You have been looking around a long time without buying. What do you want?"

Boss: "Guess I want another floorwalker. I'm the owner of this store."

THE MARCH OF PROGRESS

"Canadian Finance" contains an article to the effect that an industrial revolution is possible, owing to the discovery of Widia. Widia is next to a diamond, the hardest metal alloy known. It is the result of a secret metal alloy process of tungsten, carbon and cobalt, and was discovered by the great Krupp company of Germany. We are informed that it cuts glass or porcelain as a steel knife whittles wood; takes a keener edge than any steel and holds it longer.

It is anticipated that it will make possible the speeding up of all machines used in making the hundreds of automobile parts and all work involving cutting, grinding and drilling of metals. It cuts through steel at the rate of 230 feet a second and through cast iron at the rate of 500 feet a second. It sells for a million dollars a ton, and Krupps are now turning out about twelve tons a year.—Ex.

In Ancient Greece

The Greeks were not long in following the example of the ancient Egyptians in the making of beer.

The Greeks soon commenced to improve on their knowledge of the art of brewing, and as far back as 520 B.C. the writer Theophrastus tells us that the Greeks employed barley wine or beer ("zythos") in their daily life as well as in their festive meetings.

Today malt beverages, BEER — ALE — STOUT are considered Health Drinks.

2.

Where BEER has once been introduced, it has generally become the national beverage.

Ski Championships for Banff

Top left: Kay Harrison, Queen of the Carnival. The inset proves that Banff Winters is not all shivers. Below, en-route to Lake Louise, pictures at the right.

Announcement that the Western Ski Championships of Canada would be held at Banff during the Carnival Week February 2-9 is greeted with enthusiasm in practically every corner of the continent. Skiing has always been a feature of the Carnival, but this season, world's champions will gather there and present an exhibition which is itself would be worth travelling a thousand miles to see.

The Banff Ski hill is undergoing improvements at the present time to allow for longer and more spectacular jumps and a cabin is being erected on the top of Stony Squaw Mountain by the Banff Ski Club which is also preparing several runs suitable for beginners as for experts. Last year a favourite cross country run was to Lake Louise, part of which was accomplished as automobile tow. That this is a

worthwhile run may be gathered from the photographs above.

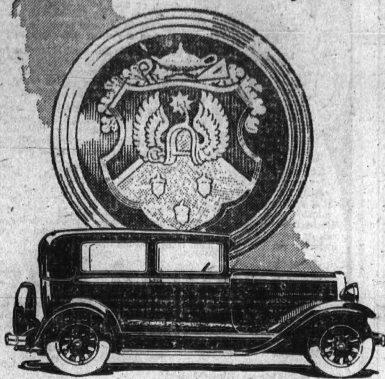

But the skiing is only one side of the Carnival life. There are the dogs and the derby, the ice and the skating, the toboggans and sleighs, the dances and fancy dress balls, curling and hockey, a properly organized sports program and a general atmosphere of spontaneity, gaiety and fun.

W. A. Brewster is chairman of the Carnival, George Hunter is secretary and the Queen—the Queen of Banff Winter Carnival February 1926—is Kay Harrison of Vancouver. Miss Harrison's might easily have been a crown of beauty and popularity, but it was also her prowess as an all-round sportsman which gave her the title. Hers will be a very merry court and it will embrace all those whose pleasure takes them to Banff during the period of her sovereignty.

and now!

OLDSMOBILE

presents

A STILL FINER CAR
AT STILL LOWER PRICE2-DOOR
SEDAN \$1125AT OSHAWA, ONT.
Government Taxes, Spare Tire
and Bumpers Extra

A YEAR AGO, Oldsmobile Six created a new type of automobile, designed and built to meet a demand that had never been answered before.

People called it "The Fine Car of Low Price." It had the character, the distinction, the luxury—the prestige, if you like—that ordinarily command such a premium in the higher priced field—and it offered these advantages in a car of convenient size, at a phenomenally low price.

Now, as the outcome of this enthusiastic public acceptance and the success which it has brought, Oldsmobile is able to present a Still Finer Car and a Still Greater Value.

To a car which seemed as near perfection as possible, Oldsmobile Six has added further refinements—further touches of distinction, outside and in—extra luxuries—deeper comfort—improved qualities of performance and endurance. Fisher master body-builders have contributed new grace and beauty, enhanced by rich Duco color harmonies.

And, thanks to increased production and consequent decreased costs, this still finer Oldsmobile is now offered at prices even lower than those which established such an amazing record of value last year. Come and see this finer Oldsmobile, now on display at our showroom! 0-23-2-229

FURIOUS FINANCE

THEME OF PICTURE

All of the feverish excitement and hysteria that accompanies a "bull drive" on the Wall Street stock exchange has been captured in George Bancroft's new starring picture for Paramount, "The Wolf of Wall Street," at the Orpheum Friday and Saturday.

To accomplish this Paramount went to unusual lengths in cast assembly and set construction. The interior of the New York Stock Exchange was duplicated in detail for one of the major sequences of the story and Hollywood and Los Angeles were scoured for men who were familiar with brokerage methods on "the floor." These men, many of them recruited from down-town offices in the financial district, were eager to see the interior of a motion picture studio and to play before the camera, and their enthusiasm, coupled with the directorial ability of Rowland V. Lee, brought out convincing performances from each of them. The scenes on the floor of the stock market are declared to be highly dramatic and authentic portrayals of what actually happens daily in this "financial heart of the world."

Baclanova, Nancy Carroll, Paul Lukas, among others, are included in the cast playing in Bancroft's support.

The story of "The Wolf of Wall Street" was written for the screen by Doris Anderson.

A league hockey game was ruled out at High River because of the action of High River fans in swarming on the ice when a fight started, not giving officials a chance to control the game. That's exactly what should have happened at Coleman a few weeks ago, when fans of that town swarmed on the ice when a scrap took place between Coleman and Blairmore players.

An auction sale of stock, furniture, implements, etc., will be conducted by W. T. Eddy at Cowley on Saturday, commencing at 2 p.m.

A dramatic recital entitled "Ben Hur," will be delivered at the Coleman United Church on the night of Tuesday, March 12th, by the Rev. J. F. Knight, of Macleod. The programme will commence at 7.15.

A grand St. Patrick's dance will be held in the Union hall at Hillcrest on the night of Monday, March 18th, under the auspices of the Hillcrest Hockey Club. See bills for further particulars.

A local Scotchman bought his wife an automobile the other day when she informed him that she had too much gas on her stomach.

"LADS" CONQUER "DADS" IN EXCITING HOCKEY GAME

A hockey game that really carried more thrills and spills with it than ever before witnessed in that sport was staged on the local arena on Friday night last between the dads and their lads. The youngsters were all there with the goods to show the old folks that good stuff was still contained in the smaller parcels and that all their stepping out at this time would be futile. A record house greeted the performance and it was indeed fortunate for all that some parties connected with the game's organization had sufficient foresight to have had on hand medical men.

Unreserved Auction Sale

AN AUCTION SALE of a complete ranching outfit, consisting of Horses, Cattle, Hay, Machinery and Household Goods will be conducted by H. D. Gerry at the ranch of Mrs. A. Schamborn, located at 30 - 9 - 1, west of the Fifth Meridian, one mile north of the North Fork School, or about 15 miles north of Lundbreck and Cowley, on Thursday, March 14th, commencing at 11 a.m.

For list of items, see bills or an advertisement appearing in the next issue of The Enterprise.

nurses, first aid teams, stimulants and stretcher bearers, for there is evidence that it had not been for the presence of such necessities many of the dads and a few of the lads would yet have been unable to follow their regular vocations and pleasures.

Immediately following this game was another equally amusing event, when the fats and leans decided to decide who would feed the other. The score on this occasion quite indicated the match, the fats winning out by something like 9 to 4. We understand since the game, certain individuals have decided that it will be necessary to replay certain portions of the game in order to give the photographer an opportunity to do justice to the encounter in the metropolitan press. A number of cameras were put out of commission during the game by flying pucks, shoes, sticks, false teeth, glass eyes, etc., and the proceeds of the double-header would not go far in meeting the damage bill.

In addition to fees collected at the gate, the fats and leans gathered from their jeans sufficient to swell the proceeds to around \$49, which amount has been handed over to the Trail Rangers.

We learn that at an executive meeting held last night, a penalty of fourteen cents each has been imposed upon Bartlett and McDonald for non-appearance at the game.

COWLEY HAPPENINGS

Harry Hannan of Lethbridge, was a visitor here during the past week.

Mr. and Mrs. James Leigh, Mrs. C. J. Bundy and Mrs. A. J. Snyder have returned from Calgary, where they had been visiting.

Miss Jean McEwen returned to Carmangay on Monday, after spending several days here during her father's illness and death.

The play, "A Chinese Garden," which was postponed some time ago, will be staged in the L.O.O.F. hall here on Saturday, March 2nd, at 8 o'clock. Proceeds go towards church funds.

The monthly meeting of the Cowley Women's Institute was held at the home of Mrs. Archie Swart on Thursday evening, February 21st. After routine business was disposed of, it was voted to make a presentation of a purse of money to help a lady who was one of the unfortunate victims of the Cowley fire disaster, which occurred on February 20th. It was also voted to send a donation to the Crow's Nest Pass Musical Festival fund. Mrs. W. Fortier, who has ably filled the office of president of the organization for over a year, resigned the position, when it was

agreed that a new president be elected. The meeting was concluded with Mrs. George Porter inviting the Institute to hold the next meeting at her home.

Another link with the past has been removed from our midst in the person of Peter McEwen, who departed this life on February the 20th at his home here, after an illness of about a month, following injuries sustained from a fall. He was born at Perth, Ontario, on January the 31st, 1857. He enlisted with the Mounted Police in Ottawa in 1877 coming west the same year to Fort Macleod. On his discharge, he homesteaded on the South Fork river. Aside from carrying on the work at the ranch, he engaged in freighting between Pincher Creek and Medicine Hat, Lethbridge and Macleod. Following the construction of the Crow's Nest Pass railway, he disposed of his home-

stead when he filed on another near Cowley. On disposing of this property, he moved into the village, where he was engaged in the livery business for a number of years. In this connection, he drove the mail from Cowley to Livingstone and Gillingham. During the Great War, he served for a time in the Home Guards at Banff. One son Alexander, was killed at the front. Mr. McEwen was a popular figure at the Old Timers' gatherings in Calgary and Lethbridge. The funeral was conducted by Rev. Neville Blunt, and took place from St. Alden's church, Cowley; the building being filled to overflowing. Sergt. Webb, R.C.M.P. of Macleod, represented the Mounted Police, and Corp. Cowsey, of Pincher Creek, represented the Great War Veterans. Interment was made in the Cowley cemetery. Those left to mourn his loss are: his wife; three sons, Will-Lille; Mrs. Agnes Foster, of Guelph, Lethbridge, and Ernest, of Blairmore; daughters, Mrs. Ruby Gilmore, of Lillooet; Mrs. Agnes Foster, of Guelph, Ontario; Mrs. Edith French, of Port Mellon, B.C.; Miss Jean, of Carmangay, and Miss Doris, at home. Sympathy was shown by floral offerings from the following: Family, St. Alden's W.A., Royal Bank Staff, W. McKay, G. E. Baines, James Scott, Mr. and Mrs. Brockwell, Mr. and Mrs. Morrison, Mr. and Mrs. Leigh, Dr. and Mrs. Donald, The B.E.S.L., Mrs. Christie, Mr. and Mrs. W. E. Tustian, Mr. and Mrs. R. Little, Mr. and Mrs. C. J. Bundy, Mr. and Mrs. F. A. Tustian, Cowley Traders' Co., Mr. and Mrs. George Porter, and Mr. J. O'Connell.

People of this community sincerely regret to learn of the incapacitation of Mrs. Susanna Evans and her son Thomas both patients at the Holy Cross hospital at Calgary, where the former has had one of her legs amputated below the knee, on account of blood poison, and we understand the latter has had to have a hand amputated.

D. M. J. Conway, former principal of the Blairmore school and now principal at Jasper, has been laid off for a few days through illness.

WORLD HAPPENINGS BRIEFLY TOLD

While visiting the Canadian section of the British Industries Fair the Prince of Wales said that he intended to endeavor to visit Canada again in the near future.

An electrical device which makes it possible for an aeroplane pilot to turn on airport landing lights by simply sounding a siren as he flies toward the field has been tried out successfully at Newark, N.J.

General Edward J. Higgins, new leader of the Salvation Army, was greeted by more than 4,000 persons at Clifton, England, at the first of a series of mass demonstrations to introduce the new chief to the army. The newspapers quote Colonel James Fitzmaurice, who resigned as chief of the Irish Free State, as saying that he intends to attempt a flight from Berlin to New York by way of the Azores in June.

The number of dependent and disability pensioners in Canada total 70,810 persons, according to a return laid by the minister of finance. They amount to \$381,507,840, an increase of \$6,355,122 over the total appropriations for the current fiscal year.

Arrangements were made for the 1920 convention of the Canadian Authors' Association at a meeting of the national executive of the association held in Toronto. The convention will be held at Halifax, on June 25, 26 and 27, with a fourth day to be spent at Annapolis Royal.

Aarvo Vaara, editor of the Finnish newspaper Vapaus, was at Sudbury, sentenced to six months' imprisonment and a fine of \$1,000 or an additional two years, by Hon. Justice Wright, following his conviction on a charge of publishing seditious libel.

Lace Making Old Art

Lace making was invented in the year 1561 at St. Annaberg, in Saxony, by Barbara Uttmann. The first establishment of lace in England in England is said to be due to some refugees from Flanders, who settled in the village of Cranfield, in the west of the county of Bedford, adjoining Buckinghamshire.

It takes 17 days to deliver a letter from London to Cape Town.

SEVERE ITCHING BURNING ECZEMA Covered Chest and Throat. Healed by Cuticura.

"Eczema broke out in a rash and covered my chest and throat. It was of a wet nature and the itching and burning were so severe that I scratched and caused eruptions. My clothing aggravated the breaking out on my chest, and the irritation prevented me from sleeping. The trouble lasted about three weeks.

"I tried several remedies without helping me. I began using Cuticura Soap and Ointment and after applying them once I felt greatly relieved and in about two weeks I was completely healed." (Signed) Mrs. Harry McCormack, New Linburgh, N. S., June 22, 1920.

Use Cuticura to heal skin troubles. Buy Cuticura Soap and Ointment from Dr. J. C. Williams, Inc., 100 N. 1st St., New York, N. Y. Write for free literature.

BLEEDING GUMS

From their color, which, in health, varies from a light pink to a dark pink, you would know at once that the gum tissues are richly supplied with blood.

Nature has planned it so purposefully, thus giving the oral tissues high regenerative powers, subject as it is daily to minor injuries with ecchymosis during the mastication of food.

Normally, gum tissue is firm and resistant, and will tolerate a much abuse, without bleeding. But should there be an undue tendency of the gums to bleed, straightaway the cause should be taken as a warning sign that something is wrong, and the family dentist consulted forthwith.

What then, may be amiss? Obviously these tissues are not in health, this being further manifested by a change in color from pink to red, or to a purplish tinge, evidencing venous congestion.

Furthermore, the gingivae may be swollen, or again, slightly shrunken at their crests, though in the early stage of gingival disease, visible manifestations other than the tendency to bleed readily may not be present.

Perhaps the first intimation you have had of this condition was when one day, performing your mouth toilet, you noticed blood welling up freely around the necks of one or more teeth. So you lanced, and rightly, that the source of this hemorrhage was in the "pockets" underlying the free gum margin.

But why here? The gum and gingival tissues are protected by a comparatively thick epithelial covering but which becomes progressively thinner as it lines the side of the pocket, until at its deepest point, this covering is extremely light, or may be missing altogether.

Here, then, is the most vulnerable point of attack on the part of the disease-bearing organisms, which, gaining access to the tissues through some cause, set up a mild regenerative process, with the result of breaking down of the cell structures and exposure and weakening of the tissue.

That with this condition present, even a mild stress on these weakened areas is sufficient to cause a hemorrhage.

There always is a reason for bleeding gums.

A PERFECT MEDICINE FOR LITTLE ONES

Baby's Own Tablets Should Be In Every Home Where There Are Children

The perfect medicine for little ones is found in Baby's Own Tablets. They are a gentle but thorough laxative which regulate the bowels, soothe the stomach; drive out constipation and indigestion; break up colds and simple fever and promote healthful and refreshing sleep. It is impossible for Baby's Own Tablets to harm even the new-born babe as they are absolutely guaranteed free from opiates or any other injurious drugs. Concerning this, Earl Taylor, Owen Sound, Ont., writes: "I have four children and have always used Baby's Own Tablets. I am never without the Tablets in the house as they are the best medicine that I know of for little ones."

Baby's Own Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Commercial Fishing On Prairies

In Saskatchewan and Alberta commercial fishing is confined to the regions north of the Saskatchewan River, where whitefish in large quantities are taken.

Some of England's finest steers come from the Orkney and Shetland Islands, where seaweed forms a large part of the sheep's foodstuff.

It is estimated that 9,000,000 pounds of silk fiber are produced in China annually.

SUNDAY SCHOOL LESSON

MARCH 3

THE CHRISTIAN CHURCH

Golden Text: "So we, who are many, are one body in Christ." Romans 12:5.

Lesson: Matthew 16:13-20; Mark 8:27-33; Luke 9:18-22; John 6:68-71; Acts 1:6-9; 1 Timothy 3:1-5.

Devotional Reading: Ephesians 4:11-13.

Explanations, and Comments

The Christian Church is a growing Church. Mark 4:29-32.—And Jesus said, "So is the Kingdom of God," that is, what you see to be God's method of working in Nature is also His method of working in the spiritual realm. The parables of Jesus show that the term "Kingdom of God" has to do with man's spiritual nature and possibilities, his inner life; it is the reign of God in the hearts of men. The Kingdom of God is as if a man should cast seed upon the earth—as Jesus and the apostles and His later followers have implanted the word of God in the hearts of men. After having sown the seed, the farmer sleeps by night and rises by day; that is, he leads his customary life and leaves the growth of the sowing to God. And the seed springs up and grows, he knoweth not how.

"Flower in the crannied wall, I pluck you out of the crannies; Hold you here, root and all, in my hand."

Little flower—but if I could understand What you are, root and all and all in all of the world of me, I should know what God and man is.—Tennyson.

The earth beareth fruit of herself.

"We plough the fields and scatter. The good seed of our land; But it is fed and watered By God's Almighty hand."

The growth of the plant is gradual but marked by progressive stages.—The blade, then the ear, then the full grain in the ear. The same is true of spiritual growth.

Nothing great is produced suddenly, not even a grape or a fig. If you say to me, "I want a grape or a fig now," I will answer you that you cannot have it; a grape takes time. Let it flower first, then it will put forth its fruit, and then ripen. And would you have the fruit of a man's life and character all in a moment? Do not expect it.—Epictetus.

"The Kingdom of God, then, is a growth. It begins with a seed; it grows on to the harvest. In the growth are three necessary elements; first, the beginning, the point of departure; second, a goal, a termination to which the progress is directed; and, third, the pathway between the beginning and the goal, leading from one to the other. This is the law of progress in all things—a "terminus ad quem," a "terminus ab quo," and a pathway between the two. He who remains in the present anchored to it, does not progress. He who cuts himself apart from the present does not know progress. He only understands the law of progress who begins with the present, vitalizing the past, and proceeds out of that past and present toward the proposed future."—Lyman Abbott.

Arizona and New Mexico are the youngest states, having been admitted into the Union in 1912.

Elm trees around a field are sometimes cut down because they drain strength of the soil.

Muscular Rheumatism Subdued.—Men one is a sufferer from muscular rheumatism he cannot do better than to have the electric rubbed with Dr. Thomas' Electric Oil. Let the rubbing be brisk and continue until ease is secured. There is more virtue in a bottle of it than can be fully estimated.

The Death's Head moth, now rarely seen, emits squeals almost as loud as those of a mouse.

Minard's Liniment prevents Flu.

Two can say "charge it" as cheaply as one.

"EVERYTHING SHIP SHAPE"

PROOF OF DYES is in the dyeing!

Words won't dye a dress, or coat, or vest, or hat. It takes real aniline to do that. That's why Diamond Dyes contain from three to five times more aniline than any other dye—by actual test. It's the aniline in Diamond Dyes that do the work; that give the colors such brilliance; such depth and permanence. It's real aniline that keeps them from giving things that re-dyed look; from spotting or streaking.

Next time you have dyeing to do, try Diamond Dyes. Then compare results. See how soft, bright, eye-looking the colors are. Observe how they keep their brilliance. Your dealer will refund your money if you don't agree Diamond Dyes are better dyes.

The white package of Diamond Dyes is the original "all-purpose" dye for any and every kind of material. It will dye or set silk, wool, cotton, linen, rayon or any mixture of materials. The blue package is a special dye, for silk or wool only. With it you can dye your valuable articles of silk or wool with results equal to the finest professional work. When you buy—remember this. The blue package dyes silk or wool only. The white package will dye every kind of goods, including silk and wool. Your dealer has both packages.

Game Birds For Alberta

Mongolian and Chinese Ring-Necked Pheasants To Be Imported

Some 2,000 Mongolian and Chinese ring-necked pheasants will be imported during the coming summer by the Calgary Fish and Game Association. These birds will be liberated throughout the southern part of the provinces where 1,800 were placed last season as part of the Game Association's plan for re-stocking Alberta's game bird supply.

Heart Palpitated Nerves Bothered Her Sleep Was Broken

Mrs. Fred A. Pugsley, East Southampton, N.S., writes:—"I was bothered very much with my nerves and palpitation of the heart, and my sleep was broken at night. I decided to try

MILBURN'S HEART AND NERVE PILLS

and after I had taken six boxes I found that they had done me so much good I would gladly recommend them to all those who are troubled with sleeplessness caused by their heart and nerves."

Price 50c. per box at all druggists and dealers, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

The Thrifty Scot

One of every three persons in Scotland has a bankbook and the amount now saved in these books is 23 million pounds, according to a report by a Glasgow bank. The amount saved last year was over a million pounds, about 116,000 of this sum being saved in "home safes."

New Patient—And is your treatment completely successful?

Nerve Specialist—My dear sir, it's so successful that only last week one of my patients tried to borrow five hundred dollars from me.

Winnipeg Is Choice For Dairy Convention

Western Canada Association Will Meet There in 1920

The 18th convention of the Western Canada Dairy Association will be held in Winnipeg, it was decided at the closing session of the annual meeting in Vancouver.

Championship prizes were awarded in the inter-provincial competitions. The Logan trophy, for the highest number of prizes for butter at fairs, was won by the Manitoba Co-operative Dairies, Brandon.

A. L. Pearson, buttermaker, with a total of 151 points. The Alberta Dairy Supplies prices for the four highest scores in inter-provincial fairs went to the following: 1, Manitoba Co-operative Dairies, Brandon; 2, Crescent Creamery, Winnipeg; 3, Russell Creamery, Russell, Man.; 4, Manitoba Co-operative Dairies, Winnipeg.

Production Of Foundation Seed

New Varieties Of Wheat Are Receiving A Great Deal Of Attention

The production of foundation seed of new promising varieties is prominent in the cereal division of the Dominion Department of Agriculture, occupies an important place among the activities of the latter. At present such new varieties as Garnet and Hereward wheat, are receiving much attention, while such older established varieties as Marquis wheat and Arthur peas are being vigorously re-selected with a view to fixing the type more definitely.

Minard's Liniment For Coughs and Colds

Regular night flights for the benefit of tourists are now being made over Hamburg, Germany.

CHAPTER XV.

On the third day of Donald's convalescence he was able to leave his cabin. With his arm in a sling, his face patched with plaster, he made the rounds of the men.

The men welcomed him with eager nods and smiles, many coming forward to shake his hand in silent respect. The big plant was now going at full blast. Belts flapped, logs thudded, planers stored loudly, and the great saw ripped shrilly through the big logs in a raising crescendo of sound.

Down at the siding an engine bumped noisily into a long string of flat-cars piled high with lumber. With arms akimbo, his wet under-shirt clinging to his powerful torso, the mop of blond hair hanging down on his brow, Gillis stood surveying the heavily-laden cars with an air of complacency. The lumber handlers sat about in positions of weariness, mopping their hot faces.

Gillis smiled cheerfully at Donald as he approached.

"Good news for you, Donnie," he said.

"What is it, Jack?"

"Last load for the big steamer," replied Gillis, as he pointed at the moving train.

"We're on time, then," cried Donald gladly.

"One day ahead," corrected Gillis.

The engineer came to the cab window as the engine passed, and pentomined his congratulations by shaking hands with himself. The train gathered speed, and as the caboose rattled by, the conductor came to the rear platform.

"Good work, boys!" he shouted.

They stood watching the train until it struck the down grade and disappeared through the cut.

"Well, that's over," observed Gillis, as he sat down heavily and wiped the sweat from his face. He looked tired and worn, but the light of victory shone in his eyes.

"If it hadn't been for you, Jack," said Donald earnestly, "we would not have got that order away on time. You look all in; you'd better have a good sleep."

"The big man's eyes brightened at Donald's praise.

"You don't look like you'd bin to a Sunday school picnic," replied Gillis with a chuckle.

As Donald walked up the hill the whistle blew for the noon-hour, and the men trooped past on their way to the dining-room. Blacks left the ranks and walked shamelessly to Donald's side.

"I'm sorry for the part I took in the strike," he said.

"It's all right, Blackie," interrupted Donald, "you more than made up for it. We'll forget all about that."

Blackie's face wore a relieved look as Donald gave him a friendly grip.

Meals in logging camps are eaten in silence and with a fixity of purpose. It is a business to be finished with as hurriedly as possible. From the time the men are seated until the chairs are pushed back, the clatter of dishes and an occasional "pass the butter" are the only sounds.

As Donald moved to his place at the table the men arose and clapped their hands. Someone called for a cheer, but Donald laughingly held up his hand.

"Men, I can't find words to tell you how much I appreciate your good work. Your long hours of labor enabled the Company to get an important order away on time, thereby saving their prestige in a big Eastern market. You will receive double pay for every hour you worked during the week."

A low murmur of applause followed this welcome announcement.

After lunch, feeling the need of exercise, Donald made his way slowly down the hill. The severe mauling and the days in bed had weakened him to such an extent that he was forced to take frequent rests.

As he turned a curve in the trail, Hand and the man with whom Andy had fought crawled stealthily from the bush, looked furtively about them then followed Donald down the hill.

He reached the open glade by the fairly new to find Connie seated by the rippling stream, her chin resting in cupped hands, and staring dreamily into the fashing water.

"Ah!" he cried gaily, "I have caught my little dryad at her original."

At the sound of his voice Connie sprang to her feet, her heart racing madly. Hearing a sound behind her, Donald turned to find the eyes of the Breed fixed on him in a malignant glare that chilled him to the marrow. For a short interval the dusky orb of the Indian held his as though with a hypnotic power.

"Where?" he ejaculated, as the Breed hobbled down the trail, "your guardian sure does give me an awful look. Why does he hate me, Connie?"

"Joe has peculiar ways," she replied.

"What were you dreaming about, Connie?" he asked interestedly.

A gay light danced momentarily in her shining eyes, and the red lips curved in a smile; "I was dreaming I was rich," she archly confessed.

"An old, old dream," smiled Donald as he stretched himself painfully on the moss.

Connie sat down near him.

As always, this spot gave Donald a restful feeling. The gentle zephyrs wafted from the woods about them were so merrily delicious and the sparkling glacial stream tickled through the glade sang its clear, sweet song. He closed his eyes wearily.

The proximity of the man she loved, lying there with his arm in a splint, his handsome face still bearing the marks of the blows he had suffered in her defence, thrilled Connie to the depths of her warm, impulsive heart. An almost overmastering desire to touch his hair possessed her.

"What would you do if you were rich, Connie?" he queried drowsily.

Connie sank back in the delicious moss and clasped her hands behind her golden head. "I'd buy a big trunk—one of that kind with the bulgy top—and I'd fill it with silks, satins, brocades, velvets and all kinds of soft frilly things. Then I'd unpack it slowly one by one and hang them up all around the room and sit down and look at them. I'd buy a great, big stone house in London, and I'd walk down the wide marble stairs, trailing a long rustling silk gown, and I'd take my longette to my eyes and say, 'James, have my carriage at the door in half-an-hour.' I'd have a country place in Scotland, with hundreds of dogs and horses, thousands of birds, and acres of flowers."

She paused for a moment.

"I'd take Dad and Peggy with me everywhere I'd go," she went on softly, "and I'd buy Dad millions of books, and for Peggy I'd buy a solid gold-mounted bridle, and lots of warm blankets for winter instead of those old sacks. I'd buy lots of good things to eat, and lots of good clothes for all the poor kiddies in the world."

She looked up at the hills. "And six months out of every year," she continued, "I'd live right here in these mountains and come every day

Children Like It—So Will You

At the first sign of a Cold, Cough, Sore Throat, or any of the many ailments that afflict the throat, use **BRECKLEY'S** Lozenges. They are the only lozenges that dissolve in the mouth, and are the only ones that are so effective.

BRECKLEY'S Lozenges are the only ones that are so effective.

75c. and 40c.

and sit beside—beside—this stream." She raised herself slowly and looked down at Donald as he lay with closed eyes. Lending forward until her golden curls almost brushed his dark hair, her eyes rested on a purple bruise on his brow. "And," she finished fiercely, "I'd fill every man like Ole Hand."

Donald laughed sleepily. "Connie, you are a dear little girl," he said tenderly.

The endearing tone held a paternal ring, and Connie bit her lip in vexation.

"I'd like to have your father go with me to Vancouver some day. Will you go?"

(To Be Continued.)

Fast Turkish Dictionary

60,000 Words Listed in Newly Adopted Latin Characters

The first Turkish dictionary in the newly adopted Latin characters is to consist of 60,000 words. Spelling and phonetic pronunciation will be fixed and enforced by law. One letter has been assigned to each member of the linguistic commission entrusted with the task.

Stamboul University experts are composing a dictionary of scientific terms previously inexpressible in Turkish, and also a medical dictionary.

The first work in the new characters put in hand by the State printing department are four new scientific works and two novels.

It is interesting to compare the new Turkish dictionary with the Oxford English Dictionary, the ten volumes of which contain 44,525 words.

His Preference

Brown was called to the police court to receive a reward for rescuing a woman from the water. "I am pleased to pin this medal to your breast," said the magistrate, "and also to lodge \$25 to your credit in the bank as an acknowledgment of your great bravery."

Brown showed some "little embarrassment," and then said: "If it's all the same to you, sir, I'd rather you'd pin the \$25 to my breast and lodge the medal in the bank."

A boy judges his mother's greatness by her ability to make pies.

Guard Against FLU — Sore Throat The First Warning.

Few families will escape. This epidemic constitutes a real danger. Health authorities everywhere warn the public of the danger of the common cold. "Flu" usually starts with Sore Throat. Unless the germs are killed by some antiseptic treatment a serious malady may develop.

A simple treatment is to gargle the throat three times daily with **Nerviline**. The antiseptic properties of **Nerviline** quickly destroy the germs in the throat. Of course if the chest is sore **Nerviline** should be rubbed over the affected area—lots of rubbing—it can't burn a blister, but will bring out the congestion and break up the cold.

To prevent "Flu" or colds from gaining headway **Nerviline** will prove most effective. It is hardly necessary to point out that the bowels should be stimulated, and the system purged of all waste matter. For this purpose Dr. Hamilton's Pills are recommended. They act without griping or discomfort of any kind. This combination treatment of **Nerviline** and Dr. Hamilton's Pills will prove a very satisfactory prevention for Grippe, Flu, etc.

WINDOLITE The Improved Glass Substitute

MADE IN ENGLAND

COMES WITH A MESSAGE OF HEALTH

THE sun is the all-powerful life producer. Nature's universal disinfectant and germ destroyer, as well as stimulant and tonic. **WINDOLITE** is the sun's most important ally.

Medical research has definitely proved that from the point of view of Health and Hygiene, the most effective among the sun's rays are the Ultra-Violet rays, which possess the greatest power for the prevention and cure of disease and debility.

Science has further established that ordinary window glass does not allow the passage of Ultra-Violet rays, so that by using glass we are artificially excluding these vital health-giving rays. Therefore, the invention of **WINDOLITE** has completely satisfied the long-felt want. Exhaustive experiments have conclusively proved that it is a most effective substitute for glass, that it freely admits the Ultra-Violet rays, and that its use has a most beneficial effect on the growth and development of plants and chickens and on the well-being of cattle, enabled for the first time to have healthy light instead of darkness in their sheds.

Indeed, the discovery of **WINDOLITE** has during the last six years completely revolutionized gardening, given a new stimulus to poultry breeding, increasing the egg-laying capacity and fertility of chickens, has greatly improved the health of cattle and is now being used in domestic and household requirements.

WINDOLITE stands for 100 per cent. sunlight. It makes light but strong windows for cattle sheds, dairy stables, poultry houses, brooders and all out buildings. It is economical, unbreakable, flexible and easy to cut and fit. It is now being successfully used for sunrooms, verandahs, schools, factories, hospitals, sanitariums, hot beds, plant coverings and greenhouses, but will not crack or chip—fits with an ordinary pair of scissors and is easy to fit. **WINDOLITE** is supplied in rolls any length but in one width of 36 inches only. A square yard of **WINDOLITE** weighs about 14 lbs., while a square yard of glass of ordinary thickness weighs about 135 to 140 lbs. The improved **WINDOLITE** requires no varnish. **WINDOLITE** is made in England.

Price \$1.50 Per Square Yard, F.o.b., Toronto.

Use **WINDOLITE** and let YOUR PLANTS YOUR CHICKENS YOUR CATTLE Bask in 100% Sunlight. Send for booklet "WINDOLITE"

ASPIRIN

Aspirin is a Trademark Registered in Canada

If you ever have rheumatism, a lumbago or other pains that penetrate to the very bones and joints, Aspirin offers such quick relief, and such complete comfort that it's folly to suffer. Keep these tablets handy in the house; and carry them in your pocket. Then you need never suffer long from any attack of neuralgia, neuritis, rheumatism, or from a bad headache. Aspirin is always a marvelous antidote for all pain and has no effect on the heart. Proven directions for many valuable uses in every box of genuine Aspirin. Every druggist has it.

THE CRIMSON WEST

—BY—**ALEX. PHILIP**

Published by Special Arrangement With Thomas Allen, Publisher, Toronto, Ont.

CHAPTER XIV.—Continued.

Donald stirred as Andy applied the water, and his one good eye opened slowly. "Did I win?" he questioned weakly.

"You bet your blinkin' life you did. When Donald's gaze rested on Connie his face twisted into a very smile. He reached for her hand and held it in a firm pressure. "Good 'ole sport," he whispered through split lips.

Connie felt as though her heart would burst. Scorching tears ran down her face, and it was with the utmost difficulty that she controlled the suffocating sobs that filled her throat.

"The sound of the big mill whistle smote their ears in a wild medley of short, sharp blasts, quite-unlike the decorous lull, that summoned and dismissed the men."

"What's that?" asked Donald, attempting to sit up.

"The engineer is celebrating, Donnie. The men 'ave returned to work. The strike is broken."

"Ah!" sighed Donald happily as he fell back on the pillows.

The distant hum of a gas car gradually increased to a series of sudden explosions, then died out staccato. They heard the light rumble of wheels as it drew to a stop at the station below. There was the sound of quick foot-steps on the board sidewalk and the door opened to admit Dr. Paul. He crossed the room and took Donald's hand, "Is it true," he asked incredulously, "that you whipped Ole Hand?"

"Strike me pink if 'e didn't," Andy vouchsafed.

"I have patched up Hand's victim's many times," the doctor stated, "but this is the first time that I have attended his victor, and I can assure

you that it's a pleasure." He removed his coat and rolled up his sleeves. "I'll look you over," he added, then glanced significantly at Connie, who rose and left the room.

"A couple of cracked ribs, a fractured ulna, and a few hundred bruises," was the doctor's verdict a few minutes later.

The physician's deft hands soon bandaged the broken ribs and set the bone of the forearm.

"I'll go and patch up the fallen bully. I hope he's worse still," he chuckled as he left the room.

Andy stepped to the door and called in Connie.

"Don't look so frightened, Connie," smiled Donald. "I don't feel half as bad as I look."

"I'll have to go now," she said in a voice choked with emotion.

Andy accompanied her outside the door. "Ave a bite to eat, Connie?" he invited.

Connie shook her head. Now that the excitement was over, the strain of the emotion she had experienced showed in the dark shadows under her eyes and in the droop of her slight shoulders. "Andy," she began, as she placed a small hand on his arm, "you—you won't say anything what—that—"

"A flood of rose dyed her tanned cheeks and her blue eyes fell in embarrassment. Andy patted her shoulder reassuringly.

"I'll never say a blinkin' word, Connie, an oyster's got nothin' on me."

Connie, visibly relieved, picked up her gun and started up the hill. Andy watched the pathetic little figure until she disappeared in the woods. For a moment he stood staring into nothingness, then, shaking his head sadly, he entered the cabin.

"She's a little brick, Andy," Donald spoke wearily from his bed.

Andy gazed at him. "Brick!" he repeated sarcastically. "Is that all? You big, bone-headed, blinkin' noob!"

He slammed the door as he went out to give emphasis to the remark.

"What the devil does he mean?" puzzled Donald. He turned painfully to his side, yawning equally as painfully, then fell into a sound sleep.

Sour Stomach

Just a tasteless dose of Phillips' Milk of Magnesia in water. That is an alkali, effective, yet harmless. It has been the standard antidote for 50 years among physicians everywhere. One spoonful will neutralize at once many times its volume in acid. It is the right way, the quick, pleasant and efficient way to kill the excess acid. The stomach becomes sweet, the pain disappears. You are happy again in five minutes.

Don't depend on crude methods. Employ the best way yet evolved in all the years of searching. That is Phillips' Milk of Magnesia.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any druggist.

The Plant and Business of the Blairmore Vulcanizing and Battery Station TO BE SOLD

The undersigned having taken an option on a certain merchandising business in South Alberta, expiring April 1st next, we are now offering our above Plant and Business for sale upon reasonable terms to a reliable purchaser, giving possession any time up to April 1st.

We have the nicest paying business in The Pass country, investments considered. Our books are open to any bona fide intending buyers for inspection. The past 1928 year was the best we have had for profits in the past eight years and this proposition is worth while investigating by anyone wanting a business of this kind.

ESTABLISHED 1770

THIS BREAKS THE RECORD

A friend of ours in Coleman forwards the following clipping from "News of the World," which we feel sure places all other record breakers in the shade: "Fourteen ounces is the weight of a baby girl born at Corwen, North Wales. She is alive and well. In recent years the record for this country was a baby girl weighing only twelve ounces, born at Caerphilly, Glamorgan, on December 13, 1927."

Almost every conceivable substitute for crutches is being used in Blairmore this week by fats and leans who suffered in the big hockey game on Friday night. The local hospitals were unable to accommodate the many victims, so that all the ladies in 'town are offering their sympathies and assistance.

The proposed new automatic telephone exchange building and equipment for Drumheller is estimated to cost in the neighborhood of \$60,000.
